THE SECURITY
SOLUTION

VISUAL IDENTITY COLOUR

PRIMARY COLOURS

The Security Solution Orange CS / M70 / Y100 / K0 R232 / G110 / B37 Hex: #b6d25c

The Security Solution Grey C0 / M0 / Y0 / K80 R88 / G89 / B91 Hex: #88898a

Orange is a mixture of the energy associated with red and the happiness associated with yellow. Orange is associated with meanings of joy, warmth, heat, sunshine, enthusiasm, creativity and success.

With the change in colour of the autumn leaves, orange often represents the changing seasons. Because of its association with change, orange is often used as a transitional colour or to represent a transition or change of some kind.

The colour orange has very high visibility and is often used to gain attention. Orange is a power colour and represents the energetic passion of the brand.

ORANGE is often associated with Halloween when used alongside the colour BLACK. For this reason, DARK GREY is the preferred secondary colour and not BLACK.

DARK GREY is a timeless and practical colour and communicates some of the strength of the colour BLACK. It is a sophisticated colour that lacks the negativity of the colour BLACK.

- The full colour Orange (CMYK) is the preferred choice to be used for all printing.
- Shades of Grey (Black) may be used in certain cases.
- Rich Black should be used for large black solid areas.
- The use of Orange tints is permitted in certain cases.

VISUAL IDENTITY TYPEFACES

TYPOGRAPHY IS IMPORTANT IN CREATING A CONSISTENT CORPORATE LOOK THROUGHOUT COMMUNICATIONS AND PROMOTIONAL MATERIAL

Charcoal CY is a sans serif font that has a corporate and clean look. This font is suitable for printing and storage because the letters are clear and tidy. It is the primary font used in the The Security Solution brand.

Helvetica is best suited for copy in all communications. Weights and styles to be used within the Helvetica family are Helvetica Light, Helvetica Regular, Helvetica Bold and Helvetica Bold Oblique.

Calibri Bold Italic is best suited for "scripty" headings or headings in fables.

The only replacement font for web and email application is Arial which is similar in style to Helvetica and is a web safe font.

The integrity of all fonts should be maintained at all times.

- Do not use vertical or horizontal scaling.
- Do not add stroke.
- Drop-shadows or other effects only to be used with approval.
